

City of Golden Valley

COVID-19 Recovery & Readiness Plan

CORR PLAN ORGANIZATION

The CORR Plan is divided into four main sections and outlines a phased approach to reopening City facilities. The four sections of the plan are:

- I. Screening and Symptoms
- II. Hygiene and Respiratory Etiquette (for employees and visitors)
- III. Common Spaces Worksite Safety Plans
- IV. Department Worksite Safety Plans

PLAN PHASES

Phase I: All employees who can work remotely must work remotely. Employees who cannot work from home (for example, Police, Fire, and Public Works) will operate under strict social distancing and respiratory hygiene protocols. City services may be redesigned to allow more employees to remain home.

Phase II: All employees who can work remotely must work remotely, but the number of employees working onsite may increase because the City is ready to increase the level of City services offered. Employees who cannot work remotely will operate under strict social distancing and respiratory hygiene protocols. Employees are able to work remotely, but service levels are significantly decreased or certain department services are not being provided.

Phase III: Some employees may continue to work remotely, but the City is ready to provide most City services on-site with social distancing and hygiene protocols that meet state and CDC standards.

NEXT STEPS & RECOMMENDED ACTION

Next Steps

- Provide a copy of plan to City employees and the public
- Provide training to all City employees
- Continue to monitor pandemic and update plan as needed

Recommended Action

MOTION to adopt City of Golden Valley COVID-19 Operations Recovery and Readiness Plan and repeal all Temporary Worksite Safety Policies and the Temporary Screenings and Symptoms and Flexible Work Arrangements Policies.
