

PARK PAVILION USE DURING COVID-19

To provide a safe environment for customers and staff, the City of Golden Valley has established additional guidelines and safety measures based on CDC recommendations for safe use of outdoor spaces.

GUIDELINES AND SAFETY MEASURES

- **OPEN:** Brookview Park Large and Small Pavilions, portable restrooms
- **RESERVATIONS:** Pavilion reservations can be made online at www.goldenvalleymn.gov/parks/brookview/shelters.php starting July 6, 2020. The City will provide full refunds to all groups who cannot work with the new social distancing capacity.
- **HEALTH AND SAFETY PROCEDURES:** Pavilions will be open at 50 percent capacity, aligning with mandated State guidelines. Maximum capacity is 25 people for the large pavilion and 12 for the small pavilion. Pavilions will be cleaned daily based on the rental schedule.
- **PUBLIC HEALTH:** Visitors must follow all public health recommendations issued by the CDC and Minnesota Department of Public Health (MDH).
 - Stay home if you don't feel well, if you were exposed to COVID-19 within the last 14 days, or if you are experiencing symptoms such as cough, fever, sore throat, shortness of breath, or congestion.
 - Cloth face masks can be considered an additional measure to reduce risk in public but are NOT a replacement for social distancing. [The MDH website has guidelines for when to wear a mask.](#)
 - Maintain social distancing of 6 feet between people at all times on Brookview grounds. Avoid physical contact with others, wait on social distancing floor markers, and follow all posted instructions.
 - If the portable bathroom is full, wait in line outside of the bathroom at least six feet away from others. Guests are encouraged to use a paper towel when touching door handles, toilet handles, and sinks.
 - Avoid touching your face with your hands and unnecessary contact with frequently touched surfaces.
 - Cough and sneeze with a tissue (or sleeve or elbow, if necessary), throw the dirty tissue away, and immediately wash your hands.
 - Wash hands frequently with soap and water (20 seconds or more), or sanitize with an alcohol-based hand sanitizer of at least 60 percent.
