## Project Wrapping Up, Final Layer of Asphalt Paving Scheduled For Areas 1, 2 & 3

In **Area 1**, crews completed curb repairs and began initial steps for sign installation. The final layer of asphalt is scheduled to be completed the week of Oct 18.

In **Area 2**, crews finished the sewer lining work and completed curb repairs. Crews also raised manholes in preparation for the final layer of asphalt, which is scheduled to be completed the week of Oct 18, and started installing signs and mailboxes, which will continue for a week or two. Area 2 residents can now re-install irrigation systems.

In the **west half of Area 2**, the sod warranty ended Oct 8 and homeowners are now responsible for maintenance. City staff has already inspected the sod and will complete any replacement in the coming weeks. Crews also hydro-seeded the open space at the intersection of Meander and Paisley.

In the **east half of Area 2**, crews continued installing sod and will be done next week.

During the past week in **Area 3**, crews completed sewer lining work and the last of the base layer paving and started landscaping work on Harold Ave and Kingston Ave. Landscaping and miscellaneous work will continue the week of Oct 18, with the final layer of asphalt scheduled for the week of Oct 25. Although landscaping is under way, residents should not re-install irrigation systems until the black dirt has been installed behind the curb.

## Water Trees and Shrubs Near Work Areas

If you want to help limit stress to trees and shrubs near the excavation areas, the best thing you can do is add water. Watering trees and shrubs before and during reconstruction will lessen any impacts to root loss or root exposure. The healthier the tree or shrub, the more it can tolerate. The contractor will minimize impacts to root zones by not stockpiling excavated materials near the driplines, by limiting excavation near trees as much as possible, and by cutting significantly exposed roots clean to promote callusing or new root proliferation.

### New This Week

Base course paving completed in Area 3. Landscaping work continues in Areas 2 and 3.

### Coming Up

Final layer of asphalt will be paved in the next week or two.

### Schedules May Change On Short Notice

Weather, delays by subcontractors, or other unforeseen events can cause schedule changes. The contractor makes every effort to notify residents as soon as possible.

### Check Doors For Notices

The contractor will routinely notify you about upcoming work, particularly if the work will make your driveway inaccessible for most or part of a day (you will be able to get back into your driveway each evening). Please check all of the doors around your house for written notices of upcoming work.

### Construction Questions

At the construction site, please direct all project-related questions to City staff. For other questions, call Public Works at 763-593-8030. If you would prefer to have Construction News emailed to you, contact Pat Schutrop at 763-593-3987 or [pschutrop@ci.golden-valley.mn.us](mailto:pschutrop@ci.golden-valley.mn.us) to get on the list.

## Who To Call (When calling, please identify your construction area.)

### City of Golden Valley

Brian Dahlberg, Engineering Technician • 763-593-8112 • [bdahlberg@ci.golden-valley.mn.us](mailto:bdahlberg@ci.golden-valley.mn.us)  
 Jeff Oliver, City Engineer • 763-593-8034 • [joliver@ci.golden-valley.mn.us](mailto:joliver@ci.golden-valley.mn.us)  
 Al Lundstrom, Environmental Coordinator • 763-593-8046 • [alundstrom@ci.golden-valley.mn.us](mailto:alundstrom@ci.golden-valley.mn.us)  
 Mike Meehan, Police Operations Commander • 763-593-8070 • [mmeehan@ci.golden-valley.mn.us](mailto:mmeehan@ci.golden-valley.mn.us)  
 Jeannine Clancy, Director of Public Works • 763-593-8035 • [jclancy@ci.golden-valley.mn.us](mailto:jclancy@ci.golden-valley.mn.us)

### CenterPoint Energy

Customer Service Office • 612-321-5369

### Special Needs?

The contractor will work with residents needing access for wheelchairs, Metro Mobility rides, etc. Call Public Works at 763-593-8030.

### After-Hour Emergencies

Call the Golden Valley Public Safety Department at 763-593-8079 to report problems that require immediate assistance by the City (flooded street, disruption to water service, sanitary sewer back-up, etc). Your message will be relayed to on-call Public Works personnel.

## Project List

### Area 1 Streets

- Edgewood Ave N (Glenwood Ave to Westchester Circle)
- Georgia Ave N (Glenwood Ave to Westchester Circle)
- Westchester Circle (Olson Memorial Frontage Rd to Glenwood Ave)

### Area 2 Streets

- Cutacross Rd (Meander Rd to Ski Hill Rd)
- Meander Rd (Glenwood Ave to Cutacross Rd)
- Paisley Lane (Glenwood Ave to Cutacross Rd)
- Pomander Walk (Paisley Lane to cul-de-sac)
- Ski Hill Rd (Paisley Lane to cul-de-sac)
- Windy Draw (Ski Hill Rd to cul-de-sac)

### Area 3 Streets

- Harold Ave (Idaho Ave N to cul-de-sac)
- Idaho Ave N (cul-de-sac to Olson Memorial Frontage Rd)
- Kingston Circle (Idaho Ave N to cul-de-sac)
- Olson Memorial Frontage Rd (Douglas Dr to Glenwood Ave)

## RECYCLING UPDATE

Recycling should be picked up as scheduled. Please continue to have your recycling curbside by 7 am on Fridays. The recycling contractor (Waste Management) will collect recycling in street reconstruction areas on schedule. Please continue to report all missed pick-ups to Waste Management at 952-890-1100. If you feel you are not getting optimum service, call the City's Environmental Coordinator at 763-593-8046.

## Tips For Maintaining New Sod

Help maintain your new sod by following these simple guidelines:

- Give new sod as much water as you can during the first four days after it has been laid. After that, sod requires about two inches of water per week until the roots take hold. Test for established roots by attempting to pull up an edge of the sod. If it pulls up easily, give it more time and continue watering at least two inches per week. If the sod edge does not come up, the roots have taken hold.
- Once the roots are established, water about one inch per week, which is the minimum amount needed to keep a lawn healthy and thriving.
- Don't mow new sod until the roots are established. Cut it first at the highest mower setting. The grass can then gradually be cut to the desired length. However, don't cut the grass to that length until next spring. Finally, fertilizing should not be necessary until next spring.

## Tips For Maintaining Your New Driveway

If you installed an asphalt driveway, follow these tips:

- You should not drive on your driveway for at least one week after it is constructed.
- Please be aware for at least six months after construction, parking any vehicle (including trailers, motorcycles, bicycles, etc) on your driveway, especially when the blacktop temperature is above 60 degrees, may leave depressions in the pavement. Also, avoid making sharp turns because they can scuff the new surface.
- Though some depressions and scuffing are expected because the new asphalt is tender for several months until it has time to cure, parking in your garage is recommended to keep depressions and scuffing to a minimum.
- Applying sealers normally does not result in any structural benefit; however, if you choose to use a sealer, it is recommended not to use any products labeled "coal tar." Instead, use asphalt emulsion sealers. Follow the manufacturer's directions for application of these products. Wait three years before applying any sealer.

If you installed a concrete driveway, follow these tips:

- The contractor sprays the new concrete with curing compound when it is poured. This seals the concrete to keep it moist and help it cure.
- Wait until next fall before sealing your concrete driveway. Several concrete sealant products, including clear acrylic sealers, linseed oil, and penetrating sealers, are available from a variety of retailers. The City identifies three in its driveway maintenance literature: Construction Materials of St Louis Park (952-929-0431), Construction Midwest of New Hope (763-536-8336), and Brock White of St Paul (651-647-0123). Many more concrete sealer retailers are listed in the Yellow Pages under "Concrete - Seal & Waterproof."

For more information about driveway maintenance, see Who To Call on page 1.

This document is available in alternate formats upon a 72-hour request. Please call 763-593-8006 (TTY: 763-593-3968) to make a request. Examples of alternate formats may include large print, electronic, Braille, audiocassette, etc.
